Buggy play store game, not kidding when I say repeats the same level 4 times, has no variety and is boring.. Pretty darn fun brings me way back to the real mario games!! only problem i seen is you bounce off everything so when you jump a gap and something is to close on other side you run into it and it bounces you back makes you fall in gap. Other than that highly recommend this game if your old school but for the price i think everyone should own it cheap and fun!. With so much garbage on steam it is nice to see a generic platformer, is the game that good? Not really i have made better games in GameMaker when i was 13, however its fine and its fine that it is on Steam. The person who made this seems like they where trying and the game shows. Its something you make as first game on Unity or Gamemaker, the game is fairly buggy but the game is a decent enough time waster.

With that in mind: The jumps accelerate you forward to way to much making jumping way to hard. Collision detection is based off of your current speed so if you hit a wall you will bounce off of it rather than stopping, Collision detection is imprecise a sign of many a first game as you need to use the (sign) function to get percise position of the Player. To the creator of this i would state: Go to Gamemaker 2, it is far easier to use and usually results in less buggy games and is usually better for 2d games.. Loveless Mario clone. Some assets were not properly prepared and have a border around the images, some sounds are clipping, some game over messages suggest ad videos were intended. Stay away.. Pretty darn fun brings me way back to the real mario games!! only problem i seen is you bounce off everything so when you jump a gap and something is to close on other side you run into it and it bounces you back makes you fall in gap. Other than that highly recommend this game if your old school but for the price i think everyone should own it cheap and fun!. is good game.
